

Stone Harbor Emerging Markets Debt Allocation Fund

Investment Objective & Philosophy

The Fund seeks to maximize total return, which consists of income on its investments and capital appreciation. We believe that investing in a portfolio of improving emerging markets debt instruments may result in strong, long-term performance. Stone Harbor uses a “top-down” approach and allocates the Fund’s investments among various emerging market countries. Stone Harbor then selects those individual investments that it believes to be most undervalued and to offer the highest potential returns relative to the amount of credit, interest rate, liquidity and other risks presented.

Individual security selection is driven by Stone Harbor’s analysis of the issuer’s credit quality paired with an assessment of valuation. The Fund expects to invest all or a significant portion of its assets in other funds sponsored or advised by Stone Harbor Investment Partners LP (the “underlying funds”).

Past performance is not a guarantee of future results. ¹As stated in the Fund’s most recent prospectus. ²Stone Harbor Investment Partners LP, the Fund’s investment adviser, has agreed to limit the amount of the Fund’s total annual expenses, inclusive of expenses of other funds in which the Fund may invest (acquired fund fees) but exclusive of brokerage expenses, interest expense, taxes, organizational and extraordinary expenses, to 0.85% of the Fund’s average daily net assets for Institutional Class shares. This agreement is in effect through 30 September 2020. Please refer to the prospectus for additional information about the Fund’s expenses. ³Effective Duration is a measure of the sensitivity of price relative to changes in interest rates for a fixed income security. Weighted Average Life is the time to repayment of principal on a security whereby the time to each principal payment is weighted by the proportional size of the corresponding payment. Average Coupon is calculated for a portfolio by weighting each security’s coupon by the size of the security investment par amount relative to total portfolio investment par. Yield to worst for a fixed income security is the lowest of yields calculated to each of the security’s call dates and maturity date. The 30-day current net (“SEC”) yield is calculated by dividing the net investment income per share for the 30 days ended on the date of calculation by the maximum offering price per share on that date. The figure is compounded and annualized. The distribution yield is based on the current NAV and the last 12 months distributions which are subject to change. Distribution payments are not guaranteed.

Important risks are described on page 2. NOT FDIC INSURED. MAY LOSE VALUE. NO BANK GUARANTEE.

Credit Quality Breakdown⁴

Top 5 Countries⁵

Additional Information

⁴Stone Harbor utilizes an average rating methodology to determine the Fund's credit quality breakdown. Sources for ratings include S&P, Moody's and Fitch. In determining the average credit quality of a security, Stone Harbor uses the following hierarchy: S&P; if S&P is unavailable, Moody's; if Moody's is unavailable, Fitch. If no rating is available, Stone Harbor applies its internal rating methodology to assign a rating. A security that has not been assigned a credit rating through Stone Harbor's methodology is listed as 'not rated'. Ratings provided in this fact sheet have been converted to the equivalent S&P rating category. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest). Cash and currency forwards generally are assigned the AAA rating. Portfolio credit quality may change over time. The Fund itself has not been rated by an independent rating agency. ⁵Benchmark: 50% J.P. Morgan EMBI Global Diversified Index / 50% J.P. Morgan GBI-EM Global Diversified Index. The benchmark is a blend of the J.P. Morgan EMBI Global Diversified Index which tracks total returns for U.S. dollar-denominated debt instruments issued by emerging markets sovereign and quasi-sovereign entities: Brady bonds, loans, and Eurobonds and J.P. Morgan GBI-EM Global Diversified Index which consists of regularly traded, liquid fixed-rate, domestic currency government bonds to which international investors can gain exposure. One cannot invest directly in an index.

The Fund currently invests most of its assets in underlying funds and the fund characteristics provide information on the holdings of the underlying funds in which the Fund invests. Fund characteristics are noted for general information purposes only, are based on characteristics as of the date indicated and are subject to change.

RISKS: An investment in the Fund involves risks, including loss of principal. The following is a summary of some of those risks. Please refer to the Fund's prospectus, including the risks described therein, for more information about the risk of investing in the Fund. Emerging markets securities are subject to greater risks arising from political or economic instability, nationalization or confiscatory taxation, currency exchange restrictions and an issuer's unwillingness or inability to make principal or interest payments on its obligations. Non-U.S. securities are subject to the risks of foreign currency fluctuations, generally higher volatility and lower liquidity than U.S. securities, less developed securities markets and economic systems and political and economic instability. The value of the Fund's investments may fall as a result of changes in exchange rates. As an investor in the underlying funds, the Fund is subject to the risks associated with a direct investment in the underlying funds, and bears its share of the fees and expenses of those funds. Any objective or target will be treated as a target only and should not be considered as an assurance or guarantee of performance of the Fund or any part of it.

This material must be accompanied or preceded by the prospectus. Please read the Fund's prospectus carefully before investing.

Control Number: SHF001020, Expiration Date: 29 May 2020.
